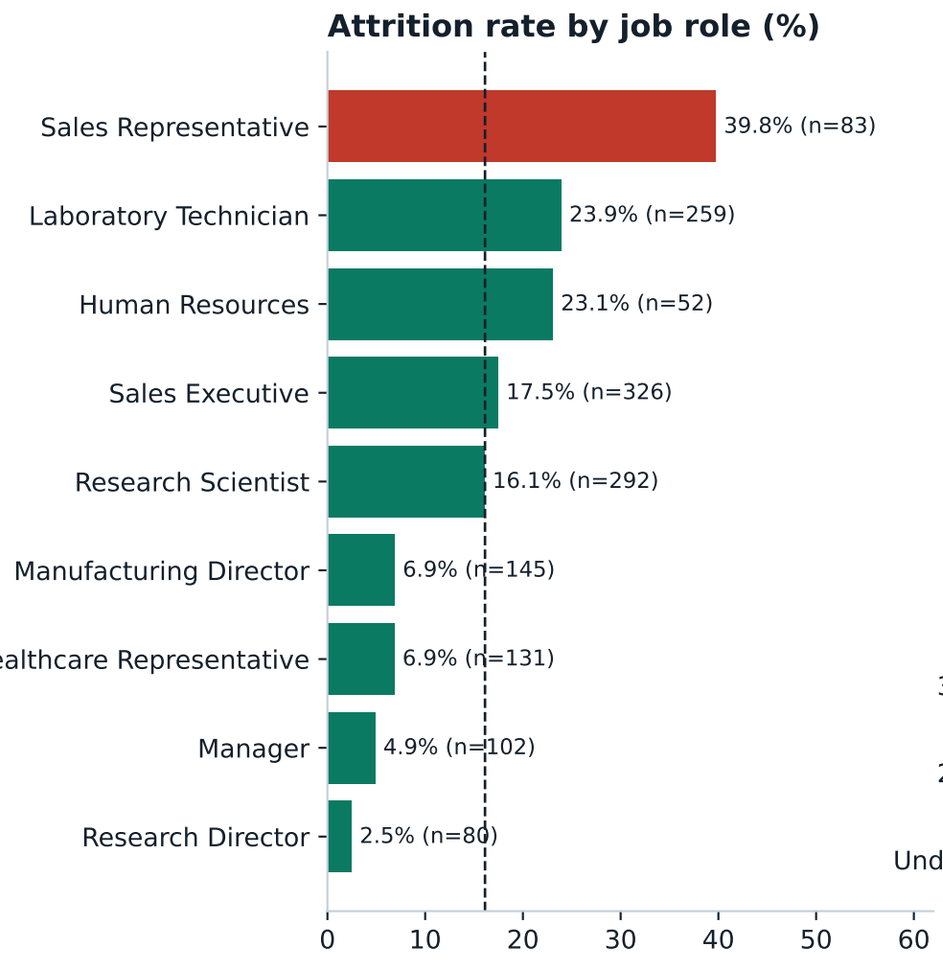
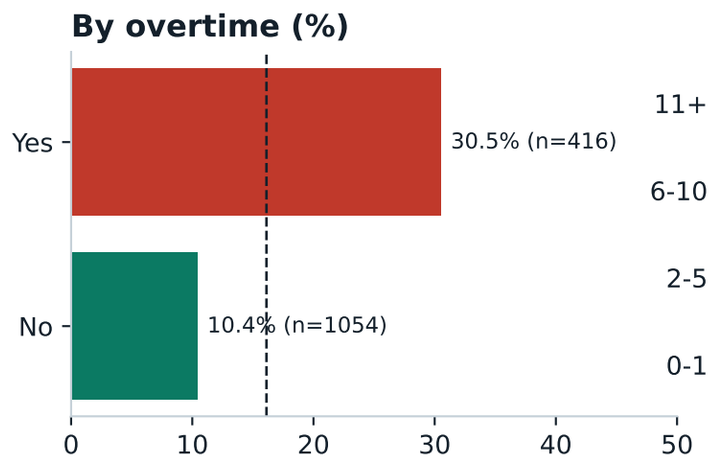
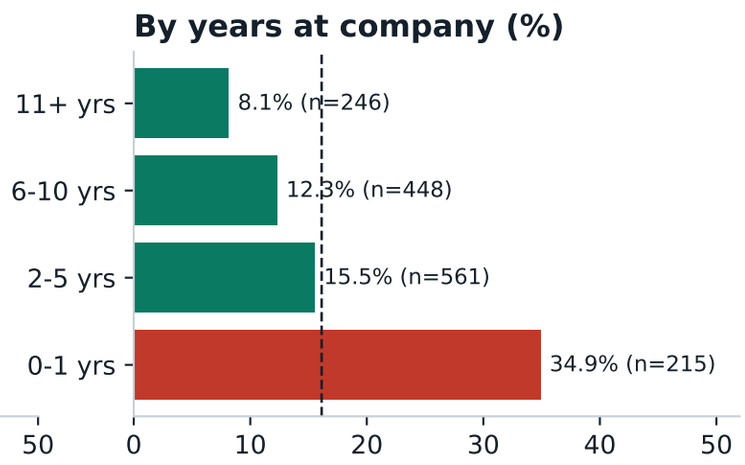
Employee Attrition Analysis

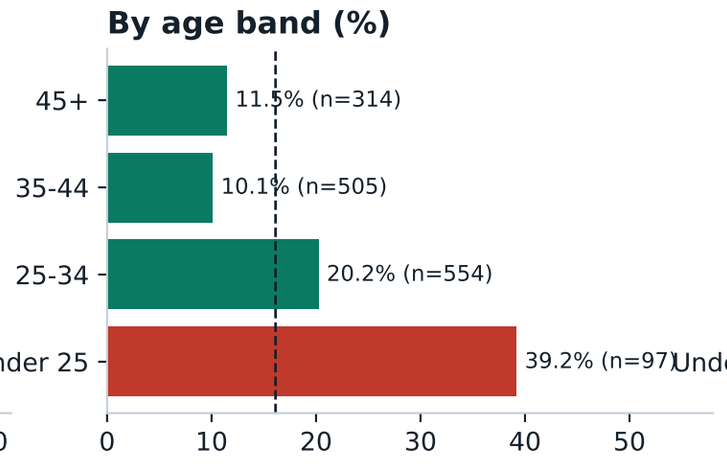
IBM HR Analytics sample dataset (1,470 employees) | Prepared by Linet Toppo

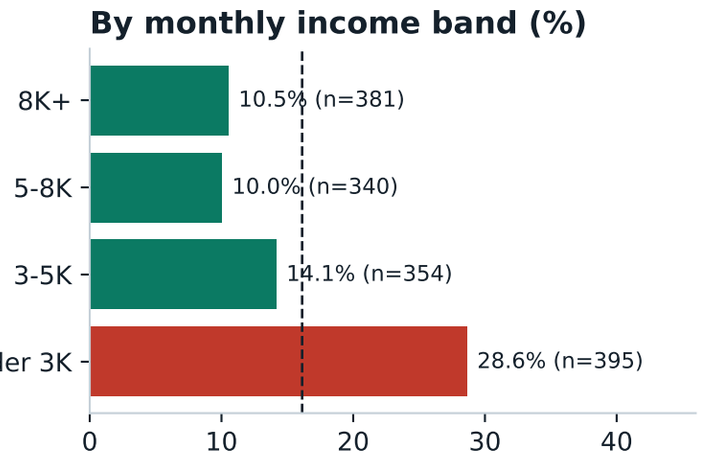
Employees	Left the company	Attrition rate	Avg income: left vs stayed
1,470	**237**	**16.1%**	**4,787 vs 6,833**











Key findings (dashed line = overall rate of 16.1%; red = 1.5x the overall rate or more)

1. Overtime is the strongest signal: 30.5% of employees working overtime left, against 10.4% of those who do not.
2. New and young employees leave most: 34.9% in their first year and 39.2% of those under 25.
3. Low pay and some roles stand out: 28.6% attrition under 3K monthly income; Sales Representatives 39.8% (small group, n=83).
